

Navigate your data room in seconds with search

Find your way effortlessly around even the most complex data rooms. Save days as you home in on specific files, words, and phrases, in 15+ languages, across multiple file types – including scans and images.

Speed to sell-side diligence

Check your data room is ready in Diligence or Prepare: all the right content in the right folders. Your advisors and analysts aren't manually sifting thousands of files, so you save resources and launch the deal sooner.

Boost buy-side efficiency

Ensure reviewers can find the files they need instantly. Use search in Acquire to sort through thousands of pages, swiftly identifying the right documents for review. Ease your team's workload – and miss nothing.

Accelerate every workflow

Let everyone collaborate faster in the data room. Customize advanced searches and export the results. Empower bidders and investors to act without assistance.

Search in any format

Deep-dive into the contents of any kind of file – documents, spreadsheets, PDFs, images containing text as graphics, and even scans of hard copies. Your whole data room is optimized for searchability.

Search in 15+ languages

Multi-language projects are no problem. Just set your default language and the search tool automatically detects 15+ other languages, wherever they appear.

Gauge project complexity

Use search to help you estimate the due diligence burden before you begin. Search results give an indication of how much work will be involved, to guide you in allocating time and resources.
